

### Shorter stays in Emergency Departments

The target is 95 percent of patients will be admitted, discharged, or transferred from an Emergency Department (ED) within six hours. The target is a measure of the efficiency of flow of acute (urgent) patients through public hospitals, and home again.

### Shorter waits for cancer treatment

The target is all patients, ready-for-treatment, wait less than four weeks for radiotherapy. Six regional oncology centres provide radiation oncology services. These centres are in Auckland, Hamilton, Palmerston North, Wellington, Christchurch and Dunedin.

This is the first time the new target is being reported. The results are provisional while we confirm the data.

### More heart and diabetes checks

The target is that, by July 2012, 60 percent of the eligible population will have had their cardiovascular risk assessed in the last five years. This target will increase in stages each year to 90 percent by July 2014. Because this is a new health target, no comparison can be made between the results this quarter and data from the previous quarter. Results for the diabetes indicators from the previous CVD/Diabetes target can be found on [www.health.govt.nz/healthtargets](http://www.health.govt.nz/healthtargets)

|                       | Quarter three provisional performance | Change from previous quarter |
|-----------------------|---------------------------------------|------------------------------|
| 1 Wairarapa           | 66%                                   | NA                           |
