

South Taranaki forum update

May 2019

Taranaki DHB is committed to improving communication with South Taranaki people through the South Taranaki Community Health Forum and Taranaki Ki Te Tonga.

Māori Health Priority Dashboard

Engagement is the key to helping reduce the health inequalities and changing the dashboard from red (20% away from the target) to green (meets the target).

Community Organisations

Some organisations are doing some positive things out in the community. It is important to have volunteers and new ones are not coming through like they used to.

Immunisation

Influenza and measles vaccines are available from your GP. People are being encouraged to take advantage of early flu vaccinations. Over 65 years and those with chronic conditions are free.

Immunisation for Older People

Immunisation at age 65 can protect against influenza, shingles, diphtheria and tetanus.

immunise
your best protection

The poster features a circular inset image of two elderly people, a man and a woman, smiling and gardening together. The background is yellow with faint circular patterns. At the bottom, there is a horizontal bar with segments of various colors (pink, blue, purple, green, red, blue, green).
